Activity Disclaimer

The material presented here is being made available by the DPC Summit Co-organizers for educational purposes only. This material is not intended to represent the only, nor necessarily best, methods or processes appropriate for the practice models discussed. Rather, it is intended to present statements and opinions of the faculty that may be helpful to others in similar situations.

Any performance data from any direct primary care practices cited herein is intended for purposes of illustration only and should not be viewed as a recommendation of how to conduct your practice.

The DPC Summit Co-Organizers disclaim liability for damages or claims that might arise out of the use of the materials presented herein, whether asserted by a physician or any other person. While the DPC Summit Co-Organizers have attempted to ensure the accuracy of the data presented here, these materials may contain information and/or opinions developed by others, and their inclusion here does not necessarily imply endorsement by any of the DPC Summit Co-Organizers.

The DPC Summit Co-Organizers are not making any recommendation of how you should conduct your practice or any guarantee regarding the financial viability of DPC conversion or practice.

Faculty Disclosure

It is the policy of the DPC Summit Co-Organizers that all individuals in a position to control content disclose any relationships with commercial interests upon nomination/invitation of participation. Disclosure documents are reviewed for potential conflict of interest (COI), and if identified, conflicts are resolved prior to confirmation of participation. Only those participants who had no conflict of interest or who agreed to an identified resolution process prior to their participation were involved in this CME activity.

All faculty in a position to control content for this session have indicated they have no relevant financial relationships to disclose.

The content of this material/presentation in this CME activity will not include discussion of unapproved or investigational uses of products or devices.

Learning Objectives

By the end of this educational activity, participants should be better able to:

1. Briefly discuss current understanding of data and quality metrics as used in primary care
2. Discuss DPC data collection practices from a handful of clinics nationwide
3. Determine what data and metrics make the most sense within your own clinic -- both from a clinical sense and a business sense

Patient Safety Indicators

- CrCl
- Fall Risk
- Skin Integrity

Regulatory Compliance

- ADB
- Nursing Care Plan
- Verbal Orders

CABSI Prevention

- Insertion Bundle
- Line Necessity
- Transition of IV to PO Meds
- Lab Frequency
- Dressing Changes
- Cap Changes
- Port Needle Changes

VAP Prevention

- Head of Bed Elevated
- Daily Evaluation of Sedation
- Oral Care
- Evaluation for Extubation Readiness

DVT Prophylaxis

- DVT Prophylaxis

Rounding Checklist

- Caloric Goal
- Goals Fluid Balance
- Foley Catheter Removal
- Chest Tube Removal
- Drug Levels
- Appropriateness for OT/PT/SLP
- Team asked, "How well is your/your child's pain controlled?"

3. Metrics can -- and should --
be retired over time.

Rule #1: We measure data for our ourselves and our patients. And nobody else.

Take 2 minutes to jot down the things that adhere to Rule #1 that you are either currently measuring or monitoring in your practice *or* data that you think would be meaningful that you would like to start measuring.

1. We measure data for our ourselves and our patients. And nobody else.

- Business-oriented metrics that, ultimately, matter:
 - Did your patients come back?
 - Are you getting new patients?

1. We measure data for our ourselves and our patients. And nobody else.

- Evidence-based practice metrics
- Business-oriented metrics
- Patient-oriented metrics

- # 1. We measure data for our ourselves and our patients. And nobody else.
- Patient-oriented metrics:

1. We measure data for our
ourselves and our patients. And
nobody else.

- Patient-oriented metrics:
 - “Better health”

1. We measure data for our ourselves and our patients. And nobody else.

- Patient-oriented metrics:
 - “Better health”
 - Prevented hospitalizations, ER visits, urgent care visits, minute clinic visits, etc.

1. We measure data for our ourselves and our patients. And nobody else.

- Patient-oriented metrics:
 - “Better health”
 - Prevented hospitalizations, ER visits, urgent care visits, minute clinic visits, etc.
 - Cost savings (for the patient)

1. We measure data for our ourselves and our patients. And nobody else.

- Patient-oriented metrics:
 - “Better health”
 - Prevented hospitalizations, ER visits, urgent care visits, minute clinic visits, etc.
 - Cost savings (for the patient)
 - Patient-developed goal support/completion

1. We measure data for our ourselves and our patients. And nobody else.

- Patient-oriented metrics:
 - “Better health”
 - Prevented hospitalizations, ER visits, urgent care visits, minute clinic visits, etc.
 - Cost savings (for the patient)
 - Patient-developed goal support/completion
 - PCPCM Survey

PERSON-CENTERED PRIMARY CARE MEASURE FIELDING AND REPORTING KIT

Thank you for your interest in fielding the Person-Centered Primary Care Measure (PCPCM).

The PCPCM is an 11-item patient-reported measure that assesses primary care aspects rarely captured yet thought responsible for primary care effects on population health, equity, quality, and sustainable expenditures. These include: accessibility, comprehensiveness, integration, coordination, relationship, advocacy, family and community context, goal-oriented care, and disease, illness, and prevention management.

We request those using the PCPCM gather a small set of contextual data points (Common Data) and report back how the measure is being used and preliminary findings using a simple, one-page form, found in this kit. This will allow us to provide updates to interested users, to continue to advance the measure, and provide a robust evidence base regarding the use and utility of the PCPCM in performance assessment, quality improvement, and policy-level decisions.

This PCPCM Fielding Kit can be found for easy download on the Green Center:

- Cover letter and quick facts regarding the PCPCM
- The PCPCM instrument

Please consider including the 8 simple demographic and contextual items below. These items can appear in the format below and on the same page as the PCPCM. Feel free to adjust formatting to enable a single page instrument if using paper forms.

PLEASE TELL US A BIT ABOUT YOURSELF	
How is your health compared to other people your age?	⁵ Excellent ⁴ Mostly good ³ Good ² Fair ¹ Poor
How many years have you known this doctor?	_____ (number of years)
Do you consider yourself a member of a minority group?	¹ Yes ⁰ No
Gender	⁴ Female ³ Male ² Trans ¹ Other
Age	_____ (number of years – us decimals for children <6)
Was it hard to complete this form?	¹ Yes ⁰ No
If your doctor or practice received the answers to these questions, would it help them to understand how you feel about your care?	¹ Yes ⁰ No
Do you have a single doctor or practice that you would say handles most of your care	¹ Yes ⁰ No

Person-Centered Primary Care Measure

Please circle the response that best fits your experience for each item. Thank you.

PATIENT'S GENERAL ASSESSMENT OF TODAY'S VISIT	RESPONSE
The practice makes it easy for me to get care.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all
This practice is able to provide most of my care.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all
In caring for me, my doctor considers all factors that affect my health.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all
My practice coordinates the care I get from multiple places.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all
This doctor or practice knows me as a person.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all
My doctor and I have been through a lot together.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all
My doctor or practice stands up for me.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all
The care I get takes into account knowledge of my family.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all
The care I get in this practice is informed by knowledge of my community.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all
Over time, this practice helps me to meet my goals.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all
Over time, my practice helps me stay healthy.	⁴ Definitely ³ Mostly ² Somewhat ¹ Not at all

D P C
Summit

June 28-30, 2019

#dpcsummit

1. We measure data for our
ourselves and our patients.
And nobody else.

**2. Metrics and data collection
should never interrupt flow.**

3. Metrics can -- and should --
be retired over time.

2. Metrics and data collection should never interrupt flow.

2. Metrics and data collection should never interrupt flow.

- Cultivate software that recognizes patterns -- and anticipates physician flow
- Patient *and* provider ownership for patients to truly own and transport their records
- Adhere to interoperability standards
- Seamless integration of clinical decision-making support tools

1. We measure data for our ourselves and our patients. And nobody else.
2. Metrics and data collection should never interrupt flow.
- 3. Metrics can -- and should -- be retired over time.**

3. Metrics can -- and should -- be retired over time.

- When a metric becomes a target in itself, it ceases to be useful.

3. Metrics can -- and should -- be retired over time.

- When a metric becomes a target in itself, it ceases to be useful.
 - *Does this improve the experience of the people we're caring for?*
 - *Does it make the physician experience better or worse?*
 - *Who is the data collector?*
 - *For whom are we collecting data?*

So.....What should we be measuring that follows the rules I just laid out?

(Remember, we get to redefine metrics, so think creatively! Broaden your mind!)
